

SAHAL P T

Thrissur, Kerala | 777sahal@gmail.com | linkedin.com/in/sahal-thaha | github.com/sahal-thaha

Professional Summary

Cybersecurity Analyst and **Cybersecurity Professional & Developer** with a background in **offensive security and full-stack development**. Experienced in **Vulnerability Assessment and Penetration Testing (VAPT)** across web, API, and application environments using Burp Suite, OWASP ZAP, and Postman to identify **OWASP Top 10 vulnerabilities** and deliver detailed security reports.

Skilled in **Python automation**, building custom security tools and CTF challenges, and leveraging **Docker, virtualization, and cloud environments** to strengthen secure development and proactive threat defense.

Technical Skills

- **Penetration Testing:** Nmap, Metasploit, Burp Suite, Sqlmap, Nikto, Hydra, Wifite, John The Ripper, Nessus, Gobuster, Aircrack-ng, Wpscan, Cmseek, Cupp, OpenVAS, OWASP ZAP
- **SOC / Monitoring:** Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Wazuh, Snort, Wireshark, IDS/IPS, Firewall
- **Virtualization & Containers:** VirtualBox, VMware Workstation Pro, Docker
- **Cloud Platforms:** AWS, Microsoft Azure
- **Scripting & Automation:** Python, Bash, PowerShell
- **Web Development:** HTML, CSS, JavaScript, React, Django, Python, Node.js
- **Databases:** Relational (MySQL, PostgreSQL, SQL-based), Non-Relational (MongoDB, Redis, NoSQL)
- **OS & Platforms:** Kali Linux, Parrot OS, Ubuntu Server, Windows
- **Networking:** TCP/IP, DNS, HTTP(S), SSH, VPNs, firewall fundamentals
- **Frameworks & Standards:** OWASP Top 10, NIST, ISO 27001

Professional Experience

Cybersecurity Intern

Beagle Security, Thiruvananthapuram

Jan 2026 — Present

- Conducted **Web and API Penetration Testing** using Burp Suite, OWASP ZAP, and Postman to identify vulnerabilities including Broken Access Control, JWT issues, rate-limiting flaws, and authorization weaknesses.
- Collaborated with a security team to assess and validate vulnerabilities in real-world applications.
- Performed manual testing and exploitation of vulnerabilities beyond automated scanning tools.
- Created detailed **VAPT reports and documentation**, including vulnerability descriptions, CVSS-based risk analysis, and actionable remediation steps.
- Participated in **CERT-In aligned security assessment processes**, performing vulnerability testing, validation, and contributing to detailed security reporting for compliance-driven evaluations.
- Engineered custom **Python-based automated tools** to streamline vulnerability scanning and reconnaissance, reducing manual testing overhead and improving the efficiency of recurring security assessments.

Cybersecurity Student Trainee

Offenso Hackers Academy, Calicut

June 2025 — December 2025

- Selected to join the Research and Development team, contributing to cybersecurity learning initiatives and internal tool exploration.

- Designed and developed a **Capture The Flag (CTF)** challenge focused on real-world vulnerability scenarios and practical exploitation techniques.

Education

B.Tech in Computer Science Engineering

APJ Abdul Kalam Technical University, Thiruvananthapuram

Nov 2021 – Mar 2025

Selected Projects

Custom Security Testing Tools

- Developed custom tools to identify vulnerabilities such as **IDOR**, **debug misconfigurations**, and **endpoint exposure** in web applications.
- Built automated crawling and **reconnaissance** modules for efficient target enumeration and attack surface mapping.
- Integrated technologies including **RabbitMQ**, **MinIO**, and **Playwright** for task queueing, storage, and automated screenshot capture.

CTF Challenge Development

- Designed and developed cybersecurity **CTF challenges** focused on **cryptography and digital forensics**, including multi-layered encryption and data analysis scenarios.
- Created challenges requiring manual reasoning, cryptographic analysis, and forensic investigation to solve.

Multimedia Synchronization System

- Developed a real-time multimedia synchronization system enabling users from different locations to watch or listen to content together.
- Implemented room-code authentication for seamless user connectivity and synchronized playback.

Certifications

- Offenso Certified Security Professional (OCSF) — Offenso Hackers Academy
- Certified Cybersecurity Educator Professional (CCEP) — RED TEAM LEADERS
- Python Course for Beginners — Perfect eLearning Private Limited
- Linux 100 Fundamentals — TCM Security Academy

Languages

- **English:** Fluent (Professional Working Proficiency)
- **Hindi:** Intermediate (Conversational)
- **Malayalam:** Native
