

SAHAL P T

Thrissur, Kerala | 777sahal@gmail.com | linkedin.com/in/sahal-thaha | github.com/sahal-thaha

Professional Summary

SOC Analyst with hands-on experience in **SIEM monitoring, log analysis, incident detection, and threat hunting**. Skilled in analyzing network, system, and authentication logs using tools such as Splunk, Wazuh, and Wireshark to identify suspicious activities and security incidents.

Familiar with **Vulnerability Assessment and Penetration Testing (VAPT)** and web technologies, enabling deeper understanding of attack patterns and effective investigation of security events. Strong in scripting and automation using Python to support security operations.

Technical Skills

- **SOC / Monitoring:** Splunk, ELK Stack, Wazuh, Snort, Wireshark, SIEM Alert Triage, IDS/IPS, Firewall
- **Incident Response:** Alert Triage, IOC Identification, Threat Hunting, Log Analysis, Escalation, Documentation
- **Threat Analysis:** MITRE ATT&CK, Behavioral Analysis, Anomaly Detection
- **Scripting & Automation:** Python, Bash, PowerShell
- **Networking:** TCP/IP, DNS, HTTP(S), SSH, VPNs
- **OS Platforms:** Windows, Ubuntu Server, Kali Linux
- **Cloud & Virtualization:** AWS, Azure, Docker, VMware, VirtualBox
- **Security Knowledge:** OWASP Top 10, NIST, ISO 27001

Professional Experience

Cybersecurity Intern

Beagle Security

Jan 2026 — Present

- Conducted **Web and API Penetration Testing** using Burp Suite, OWASP ZAP, and Postman to identify vulnerabilities including Broken Access Control, JWT issues, rate-limiting flaws, and authorization weaknesses.
- Collaborated with a security team to assess, validate, and verify vulnerabilities in real-world applications.
- Performed manual testing, exploitation, and vulnerability assessment beyond automated scanning tools.
- Created detailed **VAPT reports and documentation**, including vulnerability descriptions, CVSS-based risk analysis, and actionable remediation steps.
- Participated in **CERT-In aligned security assessment processes**, performing vulnerability testing, validation, and contributing to detailed security reporting for compliance-driven evaluations.
- Engineered custom **Python-based automated tools** to streamline vulnerability scanning and reconnaissance, reducing manual testing overhead and improving the efficiency of recurring security assessments.

Cybersecurity Student Trainee

Offenso Hackers Academy

June 2025 — Present

- Monitored and triaged **SIEM alerts** using Splunk and Wazuh to detect suspicious activities.
- Investigated system, authentication, and network logs to identify anomalies and potential threats.
- Assisted in configuring and tuning **IDS/IPS rules** using Snort.
- Performed **threat hunting** using indicators such as IP addresses, domains, and behavioral patterns.

Selected Projects

SIEM Log Analysis and Threat Detection Lab

- Simulated SOC environment using **Splunk and Wazuh** to monitor and analyze security events.
- Collected and analyzed system, authentication, and network logs to detect suspicious activities.
- Created and tuned **custom alert rules** to identify anomalies such as brute-force attempts and unauthorized access.
- Performed basic **incident investigation** using logs, correlating events to identify potential threats.

Custom Security Tools

- Developed tools to identify vulnerabilities such as **IDOR, debug misconfigurations, and endpoint exposure** in web applications.
- Built automated **reconnaissance and crawling modules** for efficient target enumeration and attack surface mapping.
- Integrated technologies including **RabbitMQ, MinIO, and Playwright** for task queueing, storage, and automated screenshot capture.
- Implemented automated data collection and analysis workflows to support security investigations.

CTF Challenge Development

- Designed and developed cybersecurity **CTF challenges** focused on **cryptography and digital forensics**, including multi-layered encryption and data analysis scenarios.
- Created challenges requiring manual reasoning, cryptographic analysis, and forensic investigation to solve.

Multimedia Synchronization System

- Developed a real-time multimedia synchronization system enabling users from different locations to watch or listen to content together.
- Implemented room-based authentication for seamless user connectivity and synchronized playback.

Education

B.Tech in Computer Science Engineering

APJ Abdul Kalam Technical University

Certifications

- Offenso Certified Security Professional (OCSF) — Offenso Hackers Academy
- Certified Cybersecurity Educator Professional (CCEP) — RED TEAM LEADERS
- Python Course for Beginners — Perfect eLearning Private Limited
- Linux 100 Fundamentals — TCM Security Academy
