Professional Summary

Full-Stack Web Developer with a strong foundation in frontend and backend development, databases, APIs, and secure web application architecture. Experienced in building scalable web applications using React, Node.js, and Python-based technologies. Also skilled in cybersecurity concepts including web security, API security, OWASP Top 10, and secure coding practices, enabling the development of reliable and security-focused applications.

Technical Skills

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js

Backend Development: Node.js, Express.js, Django, RESTful APIs, Authentication and Authorization

Databases: Relational (MySQL, PostgreSQL) | Non-Relational (MongoDB, Redis, NoSQL)

Programming Languages: C, C++, Java, JavaScript, Golang Python, Bash

DevOps & Cloud: Docker, AWS, Microsoft Azure

Operating Systems: Ubuntu, Parrot OS, Kali Linux, Windows

Cybersecurity Knowledge: Secure Coding Practices, OWASP Top 10, API Security, Web Security, Active Directory (AD)

Tools & Platforms: Git, GitHub, VirtualBox, VMware, RabbitMQ, MinIO, Playwright

Professional Experience

SOC L1 Analyst

Alliance Pro IT

July 2026 — Present

- Undergoing active technical onboarding and specialized training on enterprise defensive security platforms and SOC operational workflows.
- Developing hands-on proficiency in security orchestration, network detection, endpoint protection, and automated analysis using **FortiSOAR, FortiSIEM, FortiNDR, FortiSandbox, FortiManager, and FortiRecon**.
- Training on log aggregation, correlation rule development, and behavioral threat detection using **Innspark SIEM** integrated with **User and Entity Behavior Analytics (UEBA)**.
- Setting up simulated enterprise lab scenarios to practice real-time alert triage, incident containment, and threat intelligence mapping.

Cybersecurity Intern

Beagle Security, Thiruvananthapuram

Feb 2026 — May 2026

- Conducted **Web and API Penetration Testing** using Burp Suite, OWASP ZAP, and Postman to identify vulnerabilities including Broken Access Control, JWT issues, rate-limiting flaws, and authorization weaknesses.
- Collaborated with a security team to assess and validate vulnerabilities in real-world applications.
- Performed manual testing and exploitation of vulnerabilities beyond automated scanning tools.
- Created detailed **VAPT reports and documentation**, including vulnerability descriptions, CVSS-based risk analysis, and actionable remediation steps.
- Participated in **CERT-In aligned security assessment processes**, performing vulnerability testing, validation, and contributing to detailed security reporting for compliance-driven evaluations.
- Engineered custom **Python-based automated tools** to streamline vulnerability scanning and reconnaissance, reducing manual testing overhead and improving the efficiency of recurring security assessments.

Cybersecurity Student Trainee

Offenso Hackers Academy, Calicut

June 2025 — December 2025

- Selected to join the Research and Development team, contributing to cybersecurity learning initiatives and internal tool exploration.
- Designed and developed a **Capture The Flag (CTF)** challenge focused on real-world vulnerability scenarios and practical exploitation techniques.

Projects

SOC Lab – Threat Detection & Incident Management

- Built a complete SOC lab using **Splunk Enterprise, Sysmon, MITRE ATT&CK, ServiceNow, and Tailscale** for centralized security monitoring and incident management.
- Configured **Splunk Universal Forwarders** on Windows and Linux systems, enabling centralized log collection and cross-network monitoring through Tailscale VPN.
- Integrated **Sysmon** to collect process creation, network connections, registry modifications, service creation, and security events for enhanced endpoint visibility.
- Developed custom detections for failed logins, successful logins, privilege escalation, new user creation, and service installation events.
- Created correlation rules to identify attack chains including **Brute Force → Successful Login, New User → Privilege Escalation**, and **PowerShell → Network Activity**.
- Mapped detections to **MITRE ATT&CK** techniques using Splunk Security Essentials (SSE), CIM normalization, and Splunk Add-ons for Windows and Linux.
- Designed SOC dashboards for security monitoring, threat detection, ATT&CK coverage tracking, and operational visibility.
- Integrated **ServiceNow** for incident creation, investigation workflows, and security operations management.

Custom Security Testing Tools

- Developed custom tools to identify vulnerabilities such as **IDOR, debug misconfigurations, and endpoint exposure** in web applications.
- Built automated crawling and **reconnaissance** modules for efficient target enumeration and attack surface mapping.
- Integrated technologies including **RabbitMQ, MinIO, and Playwright** for task queueing, storage, and automated screenshot capture.

CTF Challenge Development

- Designed and developed cybersecurity **CTF challenges** focused on **cryptography and digital forensics**, including multi-layered encryption and data analysis scenarios.
- Created challenges requiring manual reasoning, cryptographic analysis, and forensic investigation to solve.

Multimedia Synchronization System

- Developed a real-time multimedia synchronization system enabling users from different locations to watch or listen to content together.
- Implemented room-code authentication for seamless user connectivity and synchronized playback.

Education

B.Tech in Computer Science Engineering

APJ Abdul Kalam Technical University, Thiruvananthapuram

Nov 2021 – Mar 2025

Certifications

- **Fortinet Training Institute Self-Paced Certifications:**
 - FortiSOAR 7.6 Administrator
 - FortiSIEM 7.2 Administrator
 - FortiNDR On-Premises 7.4 Administrator
 - FortiSandbox 5.0 Administrator
 - FortiManager Administrator

- **Networking Basics** — Cisco Networking Academy
- **Offenso Certified Security Professional (OCSF)** — Offenso Hackers Academy
- **Certified Cybersecurity Educator Professional (CCEP)** — RED TEAM LEADERS
- **Python Course for Beginners** — Perfect eLearning Private Limited

Soft Skills

Teamwork • Adaptability • Fast Learner • Problem Solving • Communication

Languages

English: Professional Working Proficiency

Hindi: Conversational

Malayalam: Native
